

# The Industry Leader in O&M Services

# The Industry Leader in O&M Services

## enXco Service Corporation

*We understand that renewable energy projects represent a substantial monetary investment, often in the hundreds of millions of dollars. Since 1987, enXco Service Corporation has ensured profitability for project owners by providing experienced, high-quality and reliable O&M services.*

*Today, with over 4,500 wind turbines under contract, enXco Service Corporation is the industry leader in O&M services, earning the respect and confidence of our partners, and delivering the best possible service and results.*

## Operations & Maintenance

**Optimize project availability with service on-site, on demand.**

With an experienced on-site team of over 275 full-time wind technicians and 50 supervisors, managers and support staff, enXco Service Corporation is fully equipped to manage the balance-of-plant and day-to-day operations of your wind project.

We ensure installation conforms to owner's direction, manufacturer's instruction, equipment requirements, and all applicable contracts and regulations.

Our maintenance plans incorporate manufacturer's recommendations and include both scheduled and unscheduled maintenance options. Our team has extensive experience with nearly every variety of wind turbine and provides the highest quality maintenance services and safety standards performed by trained enXco technicians.

- Scheduled and unscheduled maintenance
- Multiple service shops
- Trained wind technicians
- Established and proven safety program

## Management & Administration

**Maximize the life of your project.**

enXco Service Corporation provides a full spectrum of project management and administration functions, including accounting services, contract management and performance analysis to maximize the life of your project.

Owners are provided with monthly reports detailing performed and scheduled maintenance, equipment issues, energy production, revenue and cost analysis, and regulatory compliance.

# *The Leader in O&M Services:* *Safety • Quality • Experience*

By utilizing MAXIMO software to track and compile maintenance and cost information, we keep owners informed of their project's performance.

- Preparation of facility operations plans
- Parts budgeting, procurement, receiving, warehousing, and inventory control
- Management of service contracts purchased from turbine equipment suppliers
- Risk management

## Operations Control Center

**Increase revenues around the clock.**

enXco Service Corporation is able to provide 24/7 remote monitoring and basic troubleshooting from its state-of-the-art Operations Control Center (OCC). The facility is staffed around-the-clock 365 days a year with trained and experienced enXco operation technicians.

From the OCC we evaluate project performance via the SCADA system (Supervisory Control and Data Acquisition), conduct remote re-starts, and dispatch service technicians to the fault site as necessary.

With 2,209 turbines representing 3,133 MW currently being monitored, the OCC uses advanced technology to optimize turbine availability and profitability.

- Compliant with new NERC standards
- Remote monitoring and resets
- State-of-the-art technology

## **PARTS & INVENTORY**

### **Availability assured**

---

- Over 5,500 discrete part numbers readily available
- More than 950 numbers with identifiable consumable items
- Experienced in evaluating lists of “recommended spare parts” as provided by equipment manufacturers
- Parts procured at minimum costs
- MAXIMO database for inventory management

## **RE-ENGINEERING & RETROFIT**

### **Improve project economics of aging or outdated projects**

---

- Re-engineering and retrofit programs bring new life to projects
- Each program designed to address specific issues
- Projects constructed in the most cost-effective way
- More than 900 wind turbines restored and/or performance enhanced by enXco Service Corporation

## **QUALITY CONTROL (QC)**

### **Highest quality control assures the best service performance**

---

- Developed and refined industry specific QC procedures
- Strict adherence to QC procedures
- All work is performed in accordance with requirements as set forth by equipment manufacturers, warranties, insurance carriers and applicable regulations

## **SAFETY**

### **Industry leading safety program**

---

- Focused on safety of all personnel on the project site and project equipment
- Thoroughly developed enXco Service’s Safety Program
- Strict adherence to enXco Service’s Safety Manual and applicable laws

Contact enXco Service Corporation about reliable operations and maintenance services for your project. We'll help you enhance the value of your project and the return on your investment.
